Having Fun and Enjoying New Opportunities:

Thank you all for the wonderful turnout at BlastFest. A special thank you to parents and teachers who helped lead an activity area, build rockets, keep students safe, and/or move tables and chairs. It was a fun day!

Today's *Donuts With Dad/Friend* was a wonderful time of fellowship and family for those who were able to come. Your children were excited for you to be here, and we loved hosting it for you and your children.

Our 3D printer is now up and running. We look forward to introducing our students to the software that will allow them to design three dimensional objects during our computer classes.

Our Redeemer now offers a weekly Spanish class for our preschool students. We hope they enjoy class with our beloved Mrs. Hutchinson.

On Thursday, November 15, feel free to attend our "Parent School Calendar Forum." Our Redeemer parents are welcome to sit down with me at 8:30am or 4pm to discuss ideas and hopes for next school year's calendar.

L U T H E R A N S C H O O L

October 17, 2018

Dear Kindergarten-6<sup>th</sup> Grade Parent/Guardian:

This is an exciting year of technology for your student! Our goal is to ensure each student is prepared to access and use the wide variety of tools available to them on the internet in a safe and responsible manner. To do this your student's teacher will be creating individual accounts for different programs, apps, and learning systems throughout the year.

Some of the tools your student may be exposed to are:

- Google Educate - a student version of Google Drive that will allow students to create and collaborate on documents, slideshows, spreadsheets and more.
- Tinkercad - a web based application in which students can design, create, and collaborate on 3D objects that can then be printed on the 3D printer.
- Educational Apps and Websites

\*A complete list of tools will be maintained by the computer teachers as they are introduced. You may request an updated list by contacting [agoerz@orls.com](mailto:agoerz@orls.com) or [ehutchinson@orls.com](mailto:ehutchinson@orls.com).

Many current web based tools are free to teachers and students, but do require individual accounts. Information needed to register may include, but is not limited to:

- Students name
- Students date of birth (to confirm age)
- A username (which may include portions of the students name)

Each account will be created and monitored by your student's teachers. Your student's safety and security are our number one priority. All websites and tools have been thoroughly vetted by experienced educators and are used commonly in education today.

I give permission for my student/their teacher to create personal accounts on approved sites.
